

SINCE  
1961

**UNLEASH THE POWER OF SWISS PRECISION**  
PERFORMANCE REDEFINED FOR A WORLD IN MOTION

 **SWISS MADE**

Pioneering engineering solutions  
that keep the industry moving.

**Precisely.**

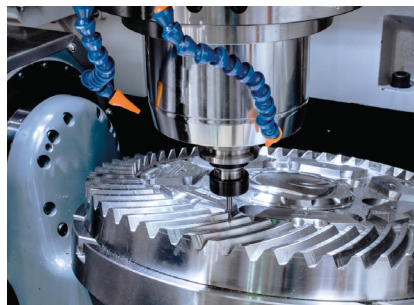

## More than a manufacturer

At WIB, our focus as a Swiss engineering company has always been on precision and quality in the production of performance bearing solutions. Over the years, we have taken that focus to new levels to achieve a **leadership position in our industry**.

From performance bearings to a complex sub-assemblies, we relentlessly pursue innovative technologies and meet the demands of today's critical applications **for industries of all types**, producing solutions that keep things moving.

## Swiss expertise worldwide

We at WIB are proud of our **Swiss know-how** and expertise and we are committed to delivering the precision associated with Swiss engineering. With an **emphasis on innovation**, this commitment to excellence ensures that every product meets the highest standards of performance and reliability.

Our international approach and mindset drive us to **export 90% of our production** as follows:

**70%**  
Europe

**20%**  
Overseas

**10%**  
Switzerland

## Seamless customer experience

Precision engineering is all about understanding the specific application and industry it will support. Our **customer service** and **technical service** engineers work closely with you to determine the

requirements of your application. From maximum temperature to the unique conditions in your work environment, **they integrate your specific needs** into designs and production.

Customer satisfaction  
is our top priority.

## Advanced engineering process

Offering a seamless blend of **design, application,** and **manufacturing engineering**, we integrate the most stringent requirements into every step of the project. With our highly qualified engineers, we are

committed to delivering unparalleled support and solutions **tailored to your specific needs**. Our processes and **multi-layered quality control** ensure the highest precision and performance.

Your toughest challenges  
are our passion projects.

## University research collaborations

In addition to our strong engineering capabilities, we prioritize **innovation in our approach**. Whether it's for new designs or existing products, our R&D team always make sure to find the best possible solution.

This is why we collaborate with some of the most **prestigious Swiss universities** on cutting-edge developments and testing, promoting innovation in the field of motion technology.

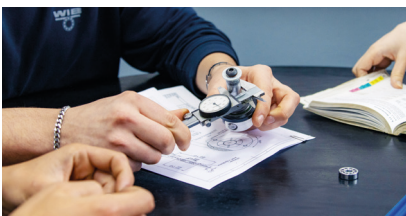

*"WIB is renowned for precision engineering and innovative bearing technology, ensuring Swiss-crafted quality and reliability with unwavering dedication."*

Kal Beidas, CEO

## Going beyond single bearings

Over the years, our expertise has extended far beyond standard components, enabling us to provide **highly specialized sub-assemblies** that meet the most demanding challenges and guarantee superior functionality in a wide range of industries.

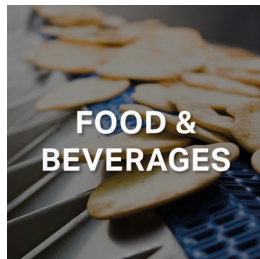

Our technical team **collaborate closely** with you to design solutions that integrate seamlessly into your systems. Each of our sub-assemblies is engineered for optimal performance and reliability, meeting the **most stringent industrial standards**.

# Applications & Industries

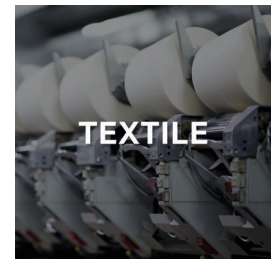

**ROBOTICS & AUTOMATION**

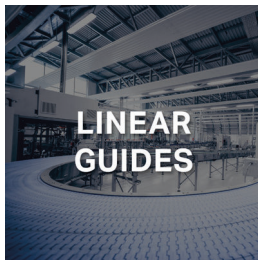

**FOOD & BEVERAGES**

**MEDICAL & DENTAL**

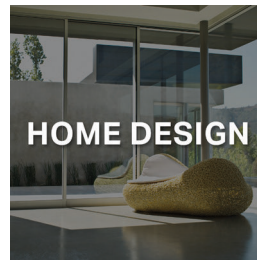

**TEXTILE**

**LINEAR GUIDES**

**SPORTS**

**HOME DESIGN**

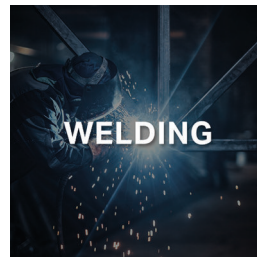

**WIRE GUIDES**

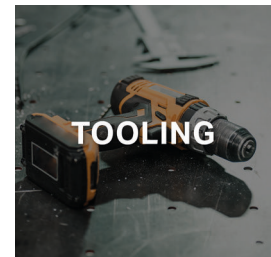

**PACKAGING**

**ELECTRIC MOTORS**

**WELDING**

**TOOLING**

# Products & Solutions

## Performance Bearings

### Core products

- Single & Double row
- Radial & Angular contact
- Self-Aligning
- Thin section
- Track rollers
- Gothic profile
- Cylindrical & Spherical
- Etc.

### Industry-specific variables

- Materials
- Shields & seals
- Cages
- Special coatings
- Heat treatment
- Lubrication
- Ceramics technology
- Etc.

## Custom Bearings

### Tailored for you

- Increased service life
- Better sealability
- More compact
- Less weight
- Higher running loads
- Reduced total cost
- Ease of assembly
- Etc.

## Sub-Assemblies

### Designed for you

Our engineers work with you to develop complex sub-assemblies that integrate our high-performance bearings into systems tailored to your specifications.

Our collaborative approach ensures that every design aligns perfectly with your unique needs and operates flawlessly within your own system and process.

## Design Engineering

### Beyond bearings

We offers expert engineering services for high-end and complex projects, leveraging our technical expertise and solution-focused approach to tackle every challenge.

Our team work with you throughout the development to create high-performance solutions tailored to your unique needs, whether they involve bearings or not.
